## OUR VISION

### It all begins with education.

The majority of around 1.5 million refugees in Jordan live outside of official refugee camps in inhumane conditions.

Many refugee children have no access to education, minimising their chances of building a secure future. As they flee their wartorn home countries in search of a safe place, they often find themselves isolated from educational settings.

In 2015, the charity organisation >Aynouna e.V.< was founded in order to support the improvement of educational systems for refugee children.

Azraq School, Al-Azraq

## OUR GOALS

- ▶ Improving the quality of life of children seeking refuge by providing food and supporting the local community.
- ▶ Securing education with financial support for school fees and school supplies.
- ▶ Ensuring health care with financial support for medical supplies.

"Jordan is often cited as having the highest ratio of refugees to the native population of any country in the world."

— International Labour Organization

## OUR PARTNERS

*„We like to think of ourselves as enhancing existing projects or filling in the gaps that other projects don't reach.“*

— Catherine Ashcroft, Gründerin HRJ

In March 2016, we visited Jordan for the first time. With the help of local organisation, we assessed the situation and got an overview of the children's needs. Since then, we have been collaborating with the charity >Helping Refugees in Jordan< (HJR) that was founded after the refugee crisis in Jordan in 2011. More than 150 volunteers support local organisations and institutions for refugees.

HRJ provides school supplies for children in need und supports local organisations financially as well as small projects that offer job opportunities for refugees.
